Applicant's election with traverse of Group II including claims 12, 15, 18, 21 and 24, filed on January 16, 2004, is acknowledged. The traversal is on the ground(s) that the claims of an application define the same essential characteristics of a single disclosed embodiment of an invention. This is not found persuasive because the claims of this application recite two groups having different purposes for inventions that would require further different considerations and/or searches.

The requirement is still deemed proper and is therefore made FINAL.

Ex parte Quayle

This application is in condition for allowance except for the following formal matters:

The non-elected claims 1-11, 13-14, 16-17, 19-20 and 22-23 should be deleted.

Reasons for indicating allowable subject matter

The prior art fails to disclose a method for analyzing sample ions, which includes the step using a mass analyzer for analyzing the sample ions produced by an ionization chamber having inner surfaces of super alloy as recited in claims 12, 15, 18, 21 and 24.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
